

ZOOM IN TO GET A CLOSER LOOK AT SPECIFIC PARTS:

Click the Magnifying Glass Icon  to get a closer look at the document.

Alternatively you may also use the "CTRL+" key combination (hold "CTRL" down at the same time "+" is held down – don't worry that you normally need to hit shift to type a "+")

ZOOM OUT TO GET AN OVERVIEW OF THE SCHEMATIC:

Click the DOWN ARROW Next to the Magnifying Glass Icon  and choose the ZOOM OUT TOOL.

Alternatively you may also use the "CTRL-" key combination (hold "CTRL" down at the same time "-" is held down)

NAVIGATING AROUND THE SCHEMATIC:

Moving a PDF page with the hand tool  is like moving a piece of paper on a desk with your hand. Just hold down the left click of the mouse and drag the file around until you are positioned where you want to be – then let the left click go.

SAVE A COPY OF THE SCHEMATIC:

Use  the save button to save a copy of the schematic.

Alternatively you may also use the "CTRL S" key combination to save the document.

Our schematics are password protected and copyrighted, so you won't be able to change them. We also regularly search the web to make sure no copies of our documents have been uploaded onto other sites.

USING THE FIND TOOL:

You may do a word find by using the  button.

Alternatively you may go to edit and choose "Find on this page".

It is useful to use the find tool. This will allow you to cross reference the part number on the diagram with the description on the list portion of the page. If you zoom out you can toggle between diagram part numbers using the "previous" and "next" buttons in the find tool.

Some browsers such as Firefox will have a "highlight all" button. With this, you may search any word you want. Then choose highlight all instances and the words you want will be highlighted in yellow or green.

ADDING A PART TO YOUR SHOPPING CART:

Once you know your part number (e.g., 22-90-131) you may go back to our search box on our home page and enter the part number and hit return. You may follow the links all the way to check out. We recommend that you call us at 440.333.0630 if you are unsure about anything. It's in everybody's best interest to get the proper part ordered the first time. We may also have other ideas about what is going on with your instrument or we may advise that it is not worth fixing your piece of equipment.
